

The plot displays the following components:

- true_function**: A horizontal green line at $y = 0$.
- predictions**: A red line with a negative slope, starting at approximately $(-4, 3.5)$ and ending at $(4, -3.5)$.
- 95% CI**: A pink shaded area representing the confidence interval around the predictions.
- train_data**: Yellow dots representing the training data points, which are clustered around the true function at $y = 0$.
